

Job Description:

Electrical Design Engineer

For over 30 years, Equipment Support Company (ESC) has been a global supplier in the design, manufacture and support of high vacuum deposition systems, focused on equipment used within the semiconductor manufacturing industry. Over the past 13 years ESC has further utilised their vast knowledge base in entering the sector of control systems and electrical panel building for the food processing and packaging industry.

ESC has a steady growth plan, and a longstanding workforce that has expanded to 19 colleagues who benefit from a happy, open environment, where contribution is noticed and appreciated, and career progression is supported.

This Electrical Design Engineer role

As an Electrical Design Engineer, you will join the team based within our office in Somersham, near Cambridge. You will spend the majority of your time creating and updating electrical design drawing packs for our systems using SolidWorks Electrical. You will also have the opportunity to provide assistance to our current Trainee. Occasional travel to customers sites will be required for design review meetings or information gathering.

As a business, we are also invested in supporting our employees to enhance their own skills, with continuous development and training opportunities available for all, so we can support you to develop your abilities, enhance your career, and encourage the positive growth of our business.

Requirements for this Electrical Design Engineer vacancy

- Proven experience as an Electrical Design Engineer, with strong understanding of electrical, electronic, hydraulic, pneumatic, and mechanical drawings and systems
- Proficiency in the use of CAD in designing circuit schematics
- Familiarity with electrical panel design and working knowledge of BS-EN60204 and EN13849
- Excellent communication and customer service skills

The Package

As an Electrical Design Engineer, you'll receive a salary of up to £40,000 with the starting level dependent on current ability and experience, and 30 days annual leave including bank holidays.

You'll be employed on a permanent contract working 37.5 hours per week within Monday to Friday, based at our company premises in Somersham near Cambridge.

All applications for this Service Manager (Engineering) vacancy are to be submitted by email to: vacancies@equipment-support.com.
